

Title	State	Project Description
Buckeye Campground & Hot Springs Reconstruction	CA	Reconstruct loop for RV sites; update water system; update pads at picnic tables/fire rings; new entrance gate; update family units to provide better experience and improve accessibility. Improve trailhead.
HWY 395 and Buckeye Road Accel/Decel Lane	CA	Highway 395 is a 65 MPH two lane road. Currently, vehicles turning into the housing compound or warehouse compound have no acceleration/deceleration lane, impacting traffic patterns. A short section of Buckeye Road will also be re-aligned.
40GAOA Virginia Lake Restroom Repair	CA	Complete replacement of roof and two doors, along with replacement of damaged hardware inside the bathroom facility. Replace damaged shingle roof with metal roof for better environmental wear. Would also upgrade to ADA equipment and access.
Trail and Kiosk Signs (Carson and Bridgeport)	CA & NV	Both RD's do not have a complete inventory of signs and kiosks. To gain a better understanding an extensive inventory will be completed to have a better understanding.
Mt. Rose and Kit Carson campgrounds pavement rehab	CA & NV	This project would crack and chip seal pavement within the Kit Carson and Mt. Rose campgrounds. These pavements have been deficient in maint. and this project would extend the pavement life, postponing the need for more expensive pavement replacement.
40GAOA South Fork Salmon River Road Pavement Rehabilitation	ID	This project would fund a leveling course where necessary and the chipsealing of the entire length of this roadway, decreasing deferred maintenance and ensuring the full lifespan of the existing surfacing.
0412 Boulder Creek Bridge Replacement	ID	This project will replace a deficient road bridge. This work will decrease the deferred maintenance on the crossing.
Boise NF SZ Deferred Trail Maintenance	ID	Trails in close proximity to Boise Metro area, popular for motorized and nonmotorized use. Lack of maintenance has resulted in resource damage from trail braiding, and pioneered routes around deadfall. Work is needed to restore and keep trails open.
Boise NF Bull Trout Recreation Area Reconstruction	ID	Project will replace campsite furniture, increase capacity, install vault toilets, improve group sites, improve boat ramps, and construct/reconstruct spurs and roads. Current capacity limits result in adjacent Forest impacts from dispersed camping.
SCNF Salmon River Road Deferred Maintenance	ID	Project involves pavement repair, guard rail repair, crushing and placing of surface rock, bridge deck seals, slope repair, and replacing the Panther Creek Bridge.
Boise NF Shafer Butte Campground Water System and Improvements	ID	Use at site is increasing. Shafer Butte CG, 45 minutes from Boise, is next to Bogus Basin Ski Area, which has new summertime operations. Project will replace/improve existing water system and improve/renovate the sites, furniture and amenities.

Boise NF Bridge 255-0.1 (M Fk. Boise River) Bridge Replacement	ID	This project proposes to replace the existing 140ft steel girder bridge w/ concrete piers with a new prefabricated steel bridge w/ no piers. The new bridge will be designed and constructed to modern standards.
Island Park AS Critical Deferred Maintenance	ID	Maintain long neglected site facilities including replacement of entire sewer system; roofing, siding and windows, doors and other minor repairs. Fire home hardening materials will be used for wildfire mitigation.
Payette NF McCall DO HVAC Deferred Maintenance	ID	Insulate all exterior walls, remove heaters and replace with heating/cooling system
40GAOA Trail Maintenance Strike Team for the Salmon-Challis, Central Idaho Wilderness Complex Trails Priority Area FY22 Phase 2	ID	Create a strike team of 5 people skilled in maintaining backcountry trails. They would work independently or with partners to maintain 700 miles of backcountry trail annually, more than doubling the miles of trail currently receiving annual maintenance
Payette NF McCall Air Base Deferred Maintenance	ID	Replacement of siding on all buildings, replacement of roofs and insulation in select buildings, upgrade of tarmac lighting to enhance security for airplanes, repaving Air Tanker Base parking lot
Payette NF Krassel WC Water & Electrical Deferred Maintenance	ID	Remove water tank & building w/ new underground water tank and replace existing electrical distribution system and generators.
40GAOA Payette NF Burgdorf GS Deferred Maintenance Phase 2	ID	Project to focus on interior deferred maintenance: flooring, paint, water heater replacement, and appliances replacement. Also septic system replacement to be included.
Boise NF Bridge 255-0.1 (MF Boise River) Bridge Replacement	ID	This project will fully replace the outdated, failing steel/concrete bridge with a new, prefabricated steel bridge with concrete abutments. Channel and alignment improvements will be made to prevent likelihood of repeated future failures.
40GAOA 0412 Payette Bridge Repairs	ID	This project will eliminate deferred maintenance on the Cottonwood, Little Weiser, and Four Bit bridges.
Big Springs Recreation Area Deferred Maintenance and Access	ID	Roads, trailheads, replace 2 accessible toilet, maintain 16 miles OHV trail and 2 bridges, reconstruct 1.5 miles accessible interpretive trail, replace 12 interpretive panels, reconstruct 2 retaining walls, maintain campground infrastructure
Paddy Flat GS Deferred Maintenance	ID	Project to focus on abatement of lead-based paint, repair/repaint siding/trim, rechalk logs, replaced windows, replaced plumbing fixtures & appliances, replaced underground propane lines, install accessibility features.
40GAOA Priest River EF Headquarters Reroofing	ID	Roof replacement on historic buildings that public use for visiting the experimental forest. Contract for new historically appropriate roofing to provide public & employees safe environment.

Boise NF Sage Hen Recreation Area Reconstruction	ID	Camping and fishing mountain retreat for Boise Metro area. Since campground was constructed in the 60's, change to design standards, accessibility standards and site vegetation (significant removal from tussock moth outbreak) drive project need.
Lowman and Crawford Fire Crew Bunkhouses	ID	Construction of a new 12 room 3,500 SF bunkhouse at Lowman District Office compound and 1664 SF modular buildings at Crawford. See attached drawings for details. Additional building disposals of 4,577 SF to be completed after construction.
Lucky Peak Nursery Greenhouse Construction	ID	Construct curtain roof greenhouse system of the same size as the existing greenhouse system. Estimated size would be 33,000 Square Feet.
Boise NF Forest Road Bridge Replacement	ID	Complete replacement of 5 short span, timber bridges with new pressure treated timber bridges and 1 longer span, steel bridge with a pre-fabricated steel Big R type bridge. Bridges would be replaced in phases, 2 each year.
Boise NF Sage Hen Reservoir Road (NFSR 614) Improvements	ID	Road condition treatment as prescribed in the PCI analysis includes crack seal all miles, slurry seal of 1 mile, chip seal of 2.3 miles, and full depth reclamation of 1 mile to improve condition and preserve road segments identified in the analysis.
Lucky Peak Nursery Cone Processing and Storage Reconstruction	ID	Design and perform renovation of existing buildings - convert multipurpose building to seed extraction building, re-purpose or retrofit existing seed extractor and cone storage building into cone preparation and cone drying facility.
40GAOA Redfish Lake (Phase 3) Road Improvements	ID	Reconstruct the remainder of FS Road #214 between SH-75 and the North Shore area of Redfish Lake to match the new widened roadway template and current AASHTO design standards. Also reconstruct/relocate adjacent parking lots for better function/use.
Lucky Peak Nursery Water System Reconstruction	ID	Project would replace the storage tank with new fiberglass tank that is properly plumbed and all deteriorated waterlines within the nursery would be replaced with HDPE waterlines and valves.
North Fork Office Rehabilitation	ID	Project addresses: DM of the NF DO; adds energy upgrades and, "Fire Smart" technology; known health/safety hazards; and, incorporates recommended security upgrades. Project leaves the site ready to function as NF DO for the next 50 yrs.
Sawtooth National Recreation Area Duplex	ID	This project includes the construction of a new duplex and the associated site amenities and utilities. The housing will be for detailers, terms, and permanent employees who would have a difficult time finding affordable housing.
Mt. Borah Trail Head and Campground Improvement and Expansion Project	ID	Project addresses visitor demand for more amenities providing for a higher quality visitor experience. Parking will be expanded. 12 drive-in and 8 walk-in sites set up. 2 more CXT SSTs. ADA Accessible trail to interpretive area and viewpoint.

Mesa Falls Boardwalk Replacement	ID	This project will replace the aging boardwalk with a new accessible boardwalk. The boardwalk will consist of a steel structure with timber plank walking surface. Stairs will be coated steel.
40GAOA Boise NF Trail Bridge Replacements	ID	This project proposes to replace 4 structurally deficient trail bridges. Bridges will be replaced with new structures designed for the specific trail use and site needs. Helicopter placement is required for at least one of the structures.
Sawtooth NRA Stanley Administrative Site Dump Station and Paving	ID	Re-construction of dump station, and replacement of pavement to dump station and within the Stanley Administrative Site. Work include culverts, base material, signage, and pavement as well as utilities (water, wastewater).
Boise NF Kirkham Day Use Site Improvements	ID	Work would include reconfigured parking and replace/improve day use facilities such as shelters and changing rooms. Replacement of deteriorated asphalt road surface, gate, and potable waterlines. Eliminate roadside parking and rehab damaged areas.
Boise NF Forest Wide Roofing, Siding, and Energy Efficiency Facility Upgrades	ID	Replacement of deteriorated roofs, siding, doors, windows, insulation, furnaces, and lighting in multiple buildings. Buildings serve as permanent quarters or primary workspaces for employees. Work would significantly improve energy efficiency.
Boise NF Grandjean Road (NFSR 524) Reconstruction	ID	5.2 miles of native surfaced ML3 road that needs drainage improvements, subgrade stabilization, road width widened, additional turnouts, and surfacing improvements (aggregate).
40GAOA Sawtooth National Forest Bald Mountain Lookout Deferred Maintenance	ID	Work include repairs to a concrete roof deck, new roof on the concrete deck, new wood shingles on the lookout portion of the building, new painting, and electrical upgrades.
Sawtooth National Forest Big Smoky RV Dump, Road Access, and Lagoon Reconstruction	ID	Replacement of dump station, hydrojet and video sewer lines, put in new membrane for two cell lagoons, and rotomill asphalt road and convert to gravelled road.
Stanley Housing Unit#7 Deferred Maintenance	ID	New fiberglass double-pane energy efficient windows, new exterior insulation and fibercement siding, and new sewer service to building.
Boulder Creek Trail Deferred Maintenance	ID	The project would include 2.4 miles of tread repair, replacement of wooden structures, reconstruction of retaining walls, switchbacks, and stream crossings.
Council Mountain Trail Reroute	ID	A 7-mile reroute would be constructed to route the trail around private lands to a trailhead proximate to existing USFS recreation infrastructure. This would create a sustainable and scenic trail segment where reasonable access does not currently exist.
Boise NF Payette River Corridor Management Plan	ID	The management plan would be completed through an agreement with a university and would include sites managed by the FS and BLM to support the uninterrupted and contiguous operation of the system regardless of agency jurisdiction.

Payette NF Developed Recreation Deferred Maintenance	ID	This project would conduct deferred maintenance on 17 campgrounds/camping areas and 5 trailheads/rec sites, including replacement picnic tables, fire rings, site post markers, signs, fee tubes, kiosks, restrooms, fencing, and a water system.
40GAOA Payette West Zone Campground Reconstruction	ID	This project would fund contracted campground survey and design for Cabin Creek CG, adjacent Horse Cabin Flat site, and Huckleberry CG based upon Forest conceptual designs. Subsequent reconstruction will improve access, health & safety.
Idaho Airstrip DM	ID	Implement Airstrip DM including: airstrip grading, drainage improvements, aviation markers, approach clear zones, windsocks, tiedowns, information signboards, campsites, latrines, and associated facility repair and maintenance.
East Fork Trail Complex Deferred Maintenance Project	ID	Reducing the deferred maintenance of 54 miles of NFS Trails by conducting much needed heavy maintenance work associated with drainage, tread work, brushing and log-out.
FY21 GAOA - South Fork Trail Deferred Maintenance	ID	Project will implement structure installation to keep tread in sections from failing into river, blasting of boulders and general trail maintenance. NFST #076/077 provides access to private land and is a multi-use trail.
Payette D6 Developed and Dispersed Rec Deferred Maintenance	ID	The project would replace vault toilets in 3 of the campgrounds, as well as, picnic tables, fire rings, site post markers, signs, and kiosks at 21 sites on the District.
40GAOA East Fork Trail Complex Deferred Maintenance Project	ID	Reducing the deferred maintenance of 54 miles of NFS Trails by conducting much needed heavy maintenance work associated with drainage, tread work, brushing and log-out.
40GAOA Salmon River Road Corridor, Recreation Site Maintenance FY22 Phase 2	ID	Project proposes to reduce deferred maintenance and other maintenance/minor work not in INFRA at all recreation sites within the Salmon River Corridor. After completion of the project the SCNF will investigate concessionaire operation of the sites.
Salmon-Challis National Forest Developed Recreation Site Maintenance on SNRA Satellite Sites Phase 2	ID	To reduce deferred MAINT and minor site IMP at 11 REC sites on the SCNF adjacent to the Sawtooth NAT'L REC Area (SNRA), include but not limited to replacing &/or repair of: fire rings, bollards, signage, restrooms, picnic tables, as well as site leveling.
Sawtooth NF - Road Surfacing Replacement	ID	The project would place gravel in those locations along the road that no longer have sufficient surfacing to provide access for the 8 months it is snow free.
40GAOA Central Idaho Wilderness Complex Priority Area Trails Maintenance, SCNF FY22 Phase 2	ID	The project will dramatically improve visitor access by: completing approximately 950 miles of trail maintenance; 83 miles of trail improvement; and, 187 miles of trails maintained to standard in the Central Idaho Wilderness Complex Priority Area.
40GAOA Sawtooth Wilderness Trails and Alice Toxaway Puncheons	ID	Work includes replacing up to 3 structures that have failed beyond reasonable repair and maintaining those that can be repaired, replacing decking, curb logs, sil logs, restructuring

		culverts and other water structures, and maintaining associated trails.
40GAOA Pioneer Campground Improvements	ID	Project will renovate the amphitheater stage and bench seating in the group use area. Campsite improvements will replace failing picnic tables, fire rings and informational signing. Campground roads will be graded and drainage will be reestablished.
40GAOA Minidoka RD Deferred Trails Maintenance	ID	Trails include: Independence Lake, (7035) Skyline (7513) Ranger (7012) Albion area Trails are in desperate need of maintenance, along with Egel Trail (7243) in the Cassia Division.
Steer Basin Double Vault Toilet Replacement	ID	Remove & replace outdated vault toilet replace with a new double vault toilet that meets accessibility standards. 100% DM at Steer Basin Campground. This facility will accommodate more visitor needs.
Canyon Transfer Camp Improvements	ID	Renovate 8 campsites, replace one vault toilet, fix water system, replace information boards, replace horse corrals and unloading ramps.
Lime Creek Deferred Trail Maintenance	ID	Project addresses deferred trail maintenance to include brushing, removal of rocks and debris, water drainage, signing, and tread repair on the following trails: 7042, 7044, 7046, 7049, 7056, 7057, 7814, 7981
Sawtooth NRA Developed Rec Site Maint. and Weed Treatment	ID	Funds would be used to purchase supplies and materials and hire a 4-person maintenance crew to replace, repair and remove damaged infrastructure, install vehicle barriers, upgrade facilities for persons with disabilities, and treat weeds.
Sawtooth NRA Restroom Replacement Phase II	ID	Toilets would be purchased, delivered and installed using an approved government contractor who can provide SSTs that meet the scenic requirements of the Sawtooth NRA. Includes Synder Springs, East Fork, and 2 at Chemekatan.
Sawtooth National Forest Valley Creek Clerks Cabin	ID	Demolition of addition to existing structure and installation of new clerk's cabin.
RMRS Moscow FSL Renovation	ID	The renovation of laboratory built in 1962 to create modern laboratory space while improving the energy efficiency through new HVAC system to allow for dependable science models for land managers.
Norton Complex Trailhead and Trail Improvements	ID	Replace the failing trail bridge; install a new trail kiosk; re-grade parking area and road; re-paint vault toilet; replace trail signs; and perform heavy maintenance on trails located within the greater Norton area.
Mormon Hill Differed Trail Maintenance	ID	The Ketchum Trail Crew and a Corps Crew will spend five weeks with pack stock assistance in the Littlewood re treading, logging out , brushing and installing drainage features on Long Gulch (#7170), Swede Peak (#7329) and Buckhonr (#7179).
Sawtooth National Forest Roofing and Siding Project	ID & UT	Removal of existing roofing and replacement with new roofing and installation of new siding.

40GAOA Caribou-Targhee Forest Trails Maintenance	ID, WY & UT	Reduce deferred maintenance on trails and trail bridges, OHV cattle guards, and access at trailheads. Purchase trail maintenance equipment/supplies for the tools necessary to maintain trails to standard.
Welcome to Your National Forest, A Portal Sign Project	ID, WY & UT	Contract to replace Forest-wide portal signs to include all major and minor portals and some trail portals. Posts, hardware and stonework will also be repaired or replaced. This will increase public awareness of land ownership and access.
R4 Bundled Road Surfacing and Pavement Maintenance	ID, WY & UT	Projects are located on several Forests in Region 4 and in the states of Utah, Wyoming, and Idaho. Tasks are projected to be completed over a 4 year period.
Ely Barracks Replacement	NV	This project would replace the two old trailers with a new barracks facility. This building will provide seasonal housing for 12-16 employees many of whom are firefighters. The new facility would be approximately 2400 to 2800 square feet.
Santa Rosa Roads and Trail Access	NV	a. This project proposal focuses on improved accessibility to trailheads, trail maintenance and placing informational bulletin boards at four wilderness trailheads.
40GAOA SMVG Amphitheater Safety Repairs	NV	This project will address worn out or damaged facilities while also improving sites to provide a better recreation experience to visitors and keeping facilities performing at their best.
40GAOA San Juan and Big Creek Campgrounds replacement/improvements	NV	Install new SINGLE SST to replace 3 already removed pit toilets at San Juan. Replace 1100 linear feet of old decaying wood fencing around campground to keep cattle from getting in to Big Creek campground.
40GAOA Ely Ranger District Campground Access Roads	NV	This Project would address wash-boards and other significant hazards on our campground access roads. This project would fund increased capacity on the road crew to address deferred maintenance issues on these roads.
H-T Pavement Rehab 2022	NV	Crack Sealing, microsurfacing, full asphalt replacement at seven campgrounds, five Ranger District Offices, the SO, and the Bridgeport Compound.
Bob Scott Campground Renovation	NV	Replace current flush toilets with new Double vault toilet. Extend, level and asphalt entire roadway and campsites. Update wooden kiosk with composite materials. Install new cattleguard and fee tube.
SMNRA Developed Recreation Site Features	NV	This project will address worn out or damaged facilities while also improving sites to provide a better recreation experience to visitors and keeping facilities performing at their best. Project will also address hazardous fuels/trees at recreation sites.
40GAOA Ophir Creek Trail Bridge	NV	The replacement will address safety concerns. There are current "band aid" fixes but will become very unsafe in the near future.

		The bridge provides access to thousands of recreational public yearly
40GAOA Carolyn Creek Trail Bridge	NV	The renovation and replacement will address safety concerns and reduce the need for future maintenance. This would include addressing structural concerns and replacing the deck and the railing for this popular trail bridge.
40GAOA Martin Creek Guard Station Cabin Rental Repairs and Lye Creek Campground ADA	NV	Update repair interior, water systems, septic, and gas at Martin Creek GS. At Lye Creek GS, install concrete pads for ADA access at campsites and toilets. See Attached.
Strawberry Bay Water & Sewer - DM Repairs	UT	This project will make critical repairs and improvements to the Strawberry Bay Recreation Complex water and wastewater systems. Work will include refurbishing sewage lift stations and water/sewer lines.
40GAOA Pineview Reservoir: Cemetery Point Stabilization Project	UT	Cemetery Point is located on a narrow peninsula with one access road. The road slope is being eroded by wave action. Work includes stabilizing existing piles and toe riprap and scour protection. The design is complete and can be implemented immediately.
Salt Lake District Office Deferred Maintenance	UT	Renovate the Salt Lake District Office. Install accessible amenities, and update interiors to accommodate the mission of the district office. Reconstruct buildings for fire engine and operations
Spanish Fork District Office Construction Project	UT	Acquire land and construct a district compound that combines the offices, warehouse, and storage facilities in one place, convenient to the national forest and the public.
Lower Middle Beaver, Ledgefork Priority Deficient Bridge Repair	UT	This project includes removing the ACROW temporary bridges and constructing new a 40-50 ft prestressed concrete slabs with treated glulam timber abutments.
Manti-La Sal South Zone Campground Fences	UT	This project would provide funding to contract out maintenance and reconstruction of campground fences across the South Zone.
40GAOA Fishlake Campground Water System Deferred Maintenance Reduction Project	UT	Planning and design of water systems for two campgrounds, installing water meters in the Fishlake Basin, completing repair work on Adelaide, City Creek, and Big Flat GS water systems.
40GAOA Manti-La Sal Fish Creek Campground and Trailhead	UT	A group use pavilion would be constructed on-site meeting a demonstrated need. Carbon County would partner to address deferred maintenance to the road accessing the site.
Forest Road and Trail Signage - Phase 2	UT	For FY 22, approximately 600 signs will be ordered and installed, replacing worn out signs. Complete Inventory work would be completed on 2 of the 5 districts, with the following district following in the next 2 years.
Manti-La Sal Flat Canyon Campground	UT	Items required to update this site include, repairing and replacing pavement into the site, widening and deepening camp

		spurs, replacing worn tables and campfire rings, building a new group campsite and pavilion.
Manti-La Sal Devils Canyon Campground Mnt - Chip Seal Road and Interpretive Trail	UT	Campground roads and access will receive a chipseal and the campground Interpretive Trail will be repaved. Campground kiosk's replaced, a new self-guided nature hike pamphlet will be designed, marker posts will be replaced and existing benches replaced.
Manti-La Sal Joes Valley Repaving and Campground Maintenance	UT	The Joes Valley Campground project seeks to address deferred maintenance of the interior campground roads, spurs, and parking areas, while also providing an additional opportunity for group camping.
Fishlake Phase 2 Non-Motorized Trails and Dispersed Recreation Deferred Maintenance	UT	This project will reduce DM in non-motorized trails and dispersed recreations sites by hiring crews to complete tasks that have not been funded in many years. Trails need to be cleared, dispersed rec sites need to be delineated and contained.
Ogden District Office & Wasatch Helibase Construction Project	UT	This project co-locates the Office and Helitack to Huntsville, UT on an existing, under-utilized administrative site. It is located at Pineview Reservoir, a high use recreation area.
Nebo Loop Road Safety Audit Repairs	UT	Short-term suggested improvements are considered to be lower-cost countermeasures that address immediate safety issues. Long-term suggested improvements are generally higher-cost improvements that may require additional capital programming.
Pleasant Grove District Office Construction Project	UT	Construct a new District Office, fire warehouse, on the acquired land that provides efficient, modern business amenities to support large recreation programs. This includes an interagency Visitor Center.
East Fork Bear River Hilliard Canal Fish Screen	UT	The project consists of 3 parts 1) Replace the pushup dam with a permanent diversion structure 2) Install a fish screen to prevent entrainment 3) Install 1.7 miles of pipeline in the canal, cover and rehabilitate the landscape
RMRS Logan Forestry Sciences Laboratory Renovation	UT	Renovation of laboratory space to meet modern research grade standards along with accessible upgrades to maximize the utilization and energy efficiency of the space to provide critical entomology & landscape science.
RMRS Logan FSL Greenhouse Renovation	UT	Logan Greenhouse/headhouse is in need of renovation through a contract in order for world class research can occur by providing space that can meet the stringent research perimeters that influence how lands are managed maximize benefit.
FY21 GAOA Manti-La Sal Road Improvement	UT	This project is for the resurfacing of 2 main forest roads and 2 campgrounds, along with the application of Magnesium Chloride to approximately 4 miles of Millers Flat road and Lake Canyon Campground roads.
Ashley Historic Guard Station Structural Preservation	UT	Renovations include LBP removal, painting, roof replacement, interior painting and flooring, basic repairs on windows and doors, septic system upgrades, solar system improvements.

Escalante District Engine Barn and Cache	UT	Construct a new two-bay Fire Engine Station with fire fuels equipment cache, office space and storage/equipment rooms (See attached documents for more info)
Daves Hollow Administrative Site Improvements	UT	Drill a new well near the campground with a constant pressure pump. Install a new water distribution system. This will bring the water system back in compliance with State and Federal law.
Indian Hollow Bridge	UT	The project will reconstruct the Indian Hollow Bridge, allowing for safe access to the municipal water system, eliminating 4 crossings (three of which are unhardened low water crossings), improve watershed acres and provide access for timber harvest.
Sheep Creek Bay Road	UT	The project will pulverize the road & parking area, mix pulverized material with existing roadbase, add roadbase where needed, replace inadequate drainage, place 3-inches HMA, and stripe the road and parking area.
Mustang Ridge Campground Road Widening and Asphalt Pavement	UT	Stabilize the existing road, shoulders and embankments and then repave the road.
40GAOA Manti La Sal Forest Wide Trail Maintenance	UT	This project would provide funding to develop supplemental project agreements and to provide matching funds for RTP grant to fund this deferred maintenance.
Dixie National Forest - Gravel Crushing	UT	See attached document
Little Hole National Rec Trail	UT	The existing boardwalk will be removed and replaced with Strongwel grating. The Strongwel grating will be anchored into the existing gabions by Uni-Strut set into the gabion baskets and all thread rod.
Pine Valley Dam Crest Raise and Low Level Outlet	UT	The Pine Valley Dam is not capable of passing the Utah Dam Safety Spillway Evaluation Flood (SEF). The dam will be overtopped. The spillway is Historically Significant. .
Tony Grove Dam Spillway Capacity and Seismic Mitigation	UT	Increase spillway capacity or raise the dam crest to pass the required storm event without overtopping the dam and defensive mechanism to prevent failure of the dam as a result of embankment cracking due to a seismic event.
South Fork Rock Creek Bridge Replacement	UT	The existing 16 x 14 bridge which impinges on the stream will be replaced with a prefabricated bridge meeting State loading criteria.
Hells Canyon Bridge Replacement	UT	The 17' x 14' wooden bridge will be replaced by a prefabricated steel bridge on shallow footings and meet State loading requirements.
Kents Lake Road Corridor Deferred Maintenance - Phase 2	UT	Replace gravel and mag chloride from mile 5 to 15.6. Replacing site furnishings and toilets in five of the districts highest use campgrounds is another primary objective.
Blackhawk Campground Reconstruction	UT	Reconstruction includes family and group sites, restrooms, water/waste water systems, signs, trail and roads. After site destroyed by fire the corridor has become over-run by dispersed camping and reconstruction will restore Scenic Byway character.

Pine Lake Campground Road and AOP	UT	Resurface the Pine Lake road and maintain campground asphalt. This includes gravel placement and a double chip seal on the Pine Lake Road and campground parking lots, chip seal of the campground road, and Clay Creek AOP construction.
Pine Valley Campground Asphalt Maintenance	UT	There haven't been local funds to treat these items, so they have been left unaddressed. There is a minor cost to treat these maintenance items which will save us from incurring a much larger reconstruction cost if these items aren't addressed.
40GAOA Spruces Campground Reconstruction Project	UT	This project will consist of the reconstruction of the campground including demolition work and reconstruction of new sites, tent pads, site furniture and water system repairs.
FY21GAOA Yankee Meadow CG Reconstruction Project – Phase 2	UT	This will fund the final construction phase for the campground. It consists of installing site furnishings, adding canopy covering due to the lack of trees (burned), installing a new double unit comfort station, and new tent pads at each of the campsites.
Dixie National Forest Trail Wide Maintenance	UT	Forest ranked high priority trails for resource protection and visitor satisfaction. These trails are important to forest visitors, local communities and health and wellness of residents and tourists.
FY21GAOA Red Canyon Trail Maintenance	UT	Repairs to rip rap and gabion retaining walls, construction and repairs of a cut off walls, repairs to drainage control devices, asphalt surfacing repairs, and construction of rest areas (pull outs), signs and information kiosks.
Pineview Reservoir Recreation Complex Reconstruction - Phase 3	UT	Reconstruction will focus on day-use facilities including picnic areas, parking lots, restroom facilities, water/waste water systems, trails, roads, and signage that will improve the visitor experience and bring consistency to reservoir management.
Cottonwood Canyons Developed Site Reconstruction - Phase 4	UT	Reconstruction includes restrooms, water/waste water systems, bridges, parking lots, trailheads, and signage that will improve the visitor experience, connect them with the landscape, and ensuring better protections for the municipal watershed.
Guard Station & Gooseberry Admin Site DM Reduction	UT	Work will include roofing, walls, doors, siding, painting, steps, rails, parking surfacing, sidewalks, cabinets, counters, porches/decks, flooring, and fencing
40GAOA Forestwide Campground Improvements	UT	Replace picnic tables and fire rings, replace fencing, install gates and cattleguards, and install pavilions at 8 campgrounds on the Ashley National Forest
40GAOA High Uintas Wilderness Trail Rehabilitation	UT	Multiple trail structures, such as boardwalks and puncheons were destroyed by the East Fork Fire and need to be replaced.
Fish Lake Basin Deferred Maintenance Project Phase 2	UT	Re-surface campground roads; update and modernize campsites; pave marinas and parking areas; renovate RV dump station; replace dilapidated restroom; renovate dumpster sites; rehabilitate sewer lift stations; and repair electrical issues.
Forest wide public restroom replacement	UT	Replacement of 20 restrooms at day use sites and campgrounds, including two at the highly popular boat ramps on the Flaming Gorge National Recreation Area.

Flaming Gorge NRA Boat Ramp Reconstruction	UT	Remove and repour the concrete boat ramp at Lucerne Boat Ramp, including new traction groves. Remove and repour the lower part of the concrete boat ramp at Sheep Creek.
Flaming Gorge NRA - Boat Ramp Accessible Facilities	UT	Construct a trail higher on the shore slope with a lower grade and pave the trail with concrete creating an accessible trail to the boat ramp courtesy dock.
Limber Flag and Grizzly Ridge Yurt Replacements	UT	The two yurts are now twenty years old are significantly deteriorated and are nearing the end of their useful life. The walls and roofs leak and have lost some structural integrity.
Moon Lake Campground repairs and improvements	UT	The project would finish the reconstruction project by installing a self pay credit card kiosk, shade structures within the Family CG, install a cattle guard to the , Moon Lake GS, and construct shade pavilions at the Moon Lake Group CG.
Duchesne RD Campground Slurry Seal	UT	Slurry seal the Rock Creek Group and Miners Gulch Campgrounds, and slurry seal the road into the Rock Creek Admin Site and Rock Creek House recreation rental.
Vernal RD Sign Replacement	UT	Replace trail, recreation site, and location signs across the Vernal RD.
Flaming Gorge NRA Arch Dam CG improvements	UT	Replace the vault toilet and construct two pavilions to provide shade and shelter at the group sites.
Carter Military Road and Dry Fork Flume Interpretation	UT	Implement a interpretive and maintenance plan for the Carter Military Road, including interpretive signs at key locations and repair and maintain sections of the historic road and install interpretive signs adjacent to the historic Dry Fork flume ruins.
Manila Office Exterior Painting, new windows, gutters, warehouse ext painting	UT	Refurbish the windows to their historical condition, paint the office, and replace the original rain gutters. All work to be done per guidance from Heritage Staff and SHPO.
Strawberry Recreation Complex Reconstruction - Phase 1	UT	The project will address DM in campgrounds, boat ramps, sewer lagoons, day use areas, roads, trails and dispersed areas.
40GAOA Forest Wide Road DM Reduction	UT	Recondition roads, restore proper drainage, remove road side vegetation, gravel or rotomill road surface
Lucerne and Antelope Flat Warehouse Roofs Replacement	UT	Re-roof Lucerne Shop/Garage and Antelope Flat Warehouse. The roofs at both of these warehouses are old and failing to the point that band-aid repairs are no longer holding and the roof integrity is being lost.
Desert ER Water System	UT	Water distribution system replacement to ensure all users have safe and reliable water.
Wasatch Front Trail Safety and Resource Protection Project	UT	Project will replace 10 deficient trail bridges, build 4 new trail bridges, and complete 12.5 miles of trail reroutes and tread improvement. The trail reroutes/improvements are for bridge placement or to move the trail away from hazardous conditions.
Flaming Gorge NRA - Fish Cleaner Replacement	UT & WY	The fish cleaning stations at Buckboard and Lucerne Boat Ramps experience significant use and have had multiple mechanical failures and breakdowns. This project would replace the two current fish cleaning stations with new, larger stations.

Flaming Gorge NRA Management Plan	UT & WY	Develop an updated management plan for the Flaming Gorge NRA that identifies direction to move the NRA towards sustainable recreation and land management.
Teton Canyon Corridor Access and Deferred Maintenance	WY	Project addresses deferred gravel road surfacing, deteriorated visitor information and trailhead facilities, deferred maintenance in 2 campgrounds, critical deferred maintenance on 4 trails including bridges and critical unsafe trail infrastructure.
Dutch Joe Bridge Replacement	WY	This project is located in Pinedale, WY within Sublette County. The 44 ft. timber bridge has structural deficiencies in the deck, superstructure, and substructure. The project will likely take 2 years to complete design and implementation.
North Piney Bridge Replacement	WY	The North Piney Creek bridge is located on Wyoming Range road FDR #10046, approximately 23 miles Northwest of Big Piney. We are proposing to design and build a new bridge, and remove the old structure.
Jackson Fire Engine Bay Replacement	WY	Project will construct a replacement fire engine facility on the Jackson Wy SO/DO site. The project includes removing an old fire cache facility. Facility is essential to fire operations locally & nationally in support of fire equipment and fire staff.
40GAOA Blackrock Ranger District Parking Lot Repairs	WY	Complete minor asphalt patch work, crack sealing, and either a scrub seal or a chip seal pavement preservation treatment to prevent further pavement degradation. This site serves as an admin site, rec site, & helitack base.
Greys River Road & Rec Improvements - Phase 2	WY	Complete 22 miles of road surfacing; replace 2 spring water systems w/wells at two rental cabins, complete rental cabin repairs at 4 cabins, replace kiosk and move interp site to snowmobile trailhead, replace picnic tables and fire rings at campground.
40GAOA Upper Green River Corridor Road Improvement - Phase 1 P&D	WY	This Phase 1 project results in completion of planning and design of the 20-mile Green River corridor road resurfacing project and Green River Recreation Site improvements for outyear implementation in FY22 and FY23.
Flaming Gorge NRA - Henry's Fork Rock Art	WY	Construct a parking area, trail to the panels, and interpretive panel signs for regulated and sustainable recreation at the rock art site and reduce the possibility of vandalism to the panels.
Upper Green River Corridor Road & Recreation Improvement - Phase 1 & 2	WY	Phase 1 replaces 8 road culverts, and replaces campground tables and fire rings, reconstructs trailhead corrals and one stock bridge, replaces a spring water system with a well, replaces gates, fences & signs at the Green River Lake Rec Site.
Jackson Hole Interface Road & Recreation Improvement Project	WY	This is a high-profile partnership and integrated resource project with multiple benefits: reduction of road and recreation site deferred maintenance, public access, wildfire risk and weed reduction, grizzly bear conservation, and economic contribution.
40GAOA WYNRT & Lander Cut-off NHT -Trail Improvement	WY	Complete heavy maintenance and short reroutes on highest priority sections of the 75-mile WYNRT, replace trail signs, markers, and trailhead facilities such as kiosks and corrals; replace signs and interp kiosks for the Lander Cut-off NHT.

Union Pass Road Improvements	WY	Road resurfacing, drainage improvement, sight-distance improvements, and proper signing will greatly improve safe access for visitors, allow for efficient forest management, and address deferred maintenance.
